

DISASTER RECOVERY & BUSINESS CONTINUITY **in a little more detail...**

One of the main considerations for any organisation, is what processes and measures do they have in place in the event of disaster and how they continue with business operations following an interruption to the core infrastructure. Failure to plan for contingencies of both a short and long term nature will represent significant cost, loss of business, damage to reputation and potentially force business closure.

How important is it to consider my IT operations when planning a Disaster Recovery and Business Continuity strategy?

Information Technology systems form a major part of the overall continuity plan for the majority of organisations. Without this function it is unlikely they will be able to communicate or produce their end product, resulting in a devastating impact on the business.

So, what's involved?

The task of ensuring systems and information availability normally rests with the IT Operations department, who have to plan for technical failure of their business systems and applications, whilst also protecting against security threats which range from denial of service attacks to malware on endpoints and mobile devices rendering them inoperable.

How is Data Connect going to be able to help me?

Data Connect have a strong experience of assisting with systems availability in areas such as email continuity and data backup. Through a wide range of cloud based solutions and hosted services we can provide a resilient infrastructure and mechanism for a full DR situation or temporary loss of a technology function. In addition, our team of specialists will assist you with advice on best practices for security and the most appropriate technology to safeguard against downtime caused by a security breach.

What if my business infrastructure is extremely complex?

We work with our customers to evaluate their specific needs and requirements and through a blend of sound professional advice and resilient technology solutions, are confident that we can fulfil key components of your overall planning in this area.

I'd like to meet to find out more.

No problem - call us today for an informal chat. We'll talk you through specific issues that might be affecting your individual business and arrange a suitable time to meet with you in person.
